Years ago, industry leaders saw the need to establish programs to encourage the use of “Greener” building products. This program encourages manufacturers to recycle productions waste and scrap materials. We are pleased to participate in the U.S. Green Building Council and LEED program to improve the environment and economic performance of construction projects.

LEED is intended to accredit an entire building or project that meets standards utilizing energy and environmental design. LockersMFG products, may contribute LEED points to your project. Since our sourcing of steel varies, can only provide specific information once a product is manufactured.

Our products may contribute points in the following categories at outlined below:
Changes made in material or FOB past the issue date of this document render this statement null and void.

LEED Category	Section	Description	Metal Lockers
Recycled Contents	MR Credit 4.1 & 4.2	Post-Consumer	25%+
		Pre-Consumer	10%-15%
		Post-Industrial	25%+

LEED Category	Section	Miles Between Project and Fabrication — Distribution
Regionally Manufactured Materials	MR Credit 5.1 & 5.2
